

STAKEHOLDER REGISTER

Project Title

Improving Customer Onboarding Controls and KYC
Efficiency in Digital Banking: A Business Analysis Case Study

The Stakeholder Register identifies individuals, groups, and external parties who have an interest in or are impacted by the customer onboarding improvement initiative. The register supports stakeholder engagement, communication planning, requirements gathering, decision-making, and project governance activities.

Customers	Surveys & User Feedback	As Required

COMMUNICATION OBJECTIVES

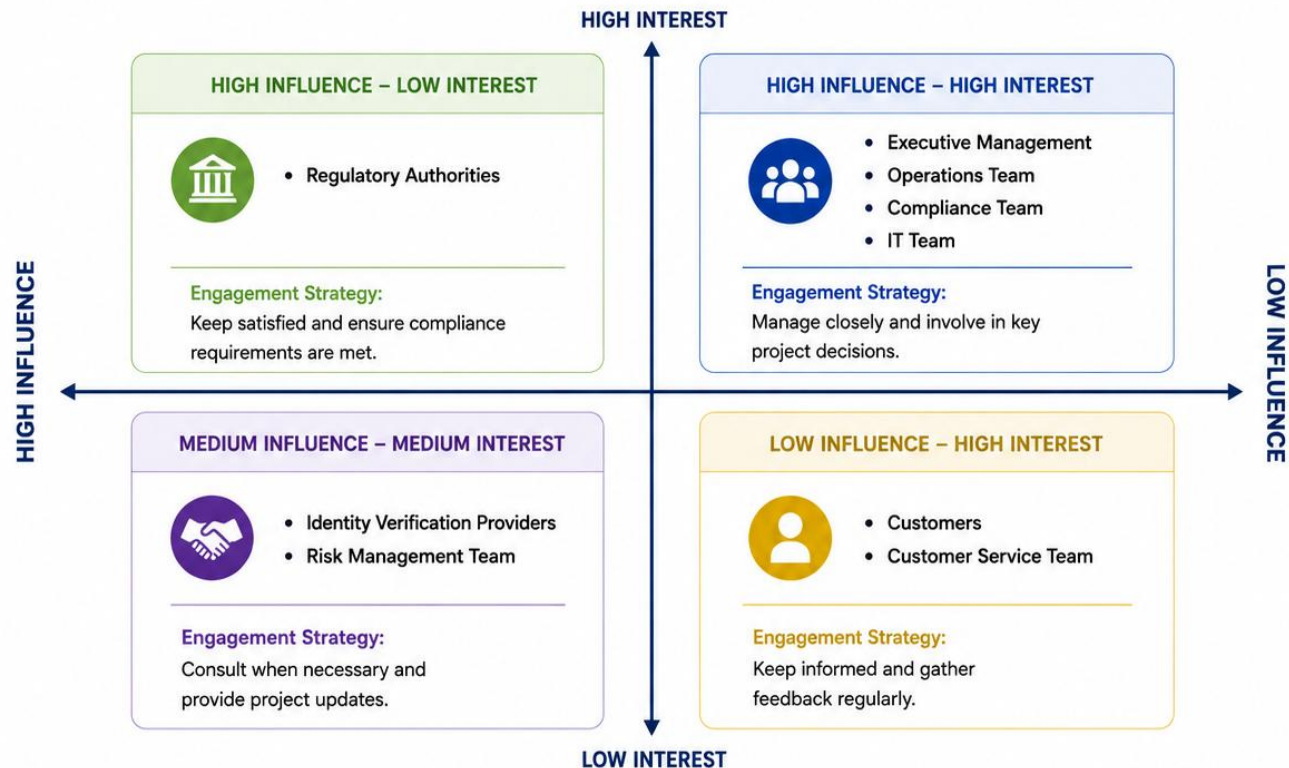

- Keep stakeholders informed of project progress
- Facilitate requirements gathering and validation
- Manage stakeholder expectations
- Support decision-making and issue resolution
- Promote stakeholder engagement throughout the project lifecycle

STAKEHOLDER ANALYSIS

Power-Interest Matrix

This matrix helps prioritize stakeholders based on their level of influence (power) and interest in the project, and defines the appropriate engagement strategy for each group.

STAKEHOLDER ENGAGEMENT STRATEGIES

MANAGE CLOSELY

- Executive Management
- Operations Team
- Compliance Team
- IT Team

High influence and high interest stakeholders. Involve them in key decisions and manage closely.

KEEP SATISFIED

- Regulatory Authorities

High influence but low interest stakeholder. Keep satisfied and ensure compliance requirements are met.

KEEP INFORMED

- Customers
- Customer Service Team

High interest but low influence stakeholders. Keep informed and gather feedback regularly.

CONSULT AND UPDATE

- Identity Verification Providers
- Risk Management Team

Medium influence and medium interest stakeholders. Consult when necessary and provide project updates.
