

DASHBOARD REQUIREMENTS DOCUMENT (DRD)

Project Title

Payment Reconciliation Process Optimization
and Automation: A Business Analysis Approach

PAYMENT RECONCILIATION DASHBOARD

DOCUMENT PURPOSE & BUSINESS OBJECTIVES

Providing real-time visibility into reconciliation performance, exception management, revenue assurance, and operational efficiency.

1. DOCUMENT PURPOSE

The purpose of this document is to define the business and reporting requirements for the Payment Reconciliation Dashboard. The dashboard will provide visibility into:

TRANSACTION PROCESSING

Monitor payment transaction activities.

RECONCILIATION PERFORMANCE

Track reconciliation progress and outcomes.

EXCEPTION MANAGEMENT

Identify and manage unmatched transactions.

REVENUE ASSURANCE

Detect revenue leakages and improve collections.

OPERATIONAL EFFICIENCY

Measure reconciliation effectiveness.

DECISION SUPPORT

Deliver real-time and historical insights.

DASHBOARD VALUE

Real-Time Monitoring

Historical Analysis

Performance Tracking

Operational Transparency

Improved Reporting

2. BUSINESS OBJECTIVE

The dashboard aims to:

IMPROVE VISIBILITY

Provide comprehensive reconciliation oversight.

MONITOR PERFORMANCE

Track KPIs and reconciliation trends.

IDENTIFY EXCEPTIONS

Highlight unmatched transactions quickly.

ENHANCE REVENUE ASSURANCE

Improve revenue protection and accountability.

SUPPORT TIMELY DECISION-MAKING

Enable faster management response.

REDUCE MANUAL REPORTING EFFORT

Automate reporting processes.

IMPROVE FINANCIAL CONTROLS

Strengthen governance and compliance.

EXPECTED OUTCOMES

Better Reconciliation Accuracy

Faster Reporting

Improved Revenue Protection

Reduced Operational Effort

Stronger Financial Governance

DASHBOARD INSIGHT FLOW

TRANSACTION DATA
Collect payment transaction data

RECONCILIATION ANALYSIS
Analyze and match transactions

EXCEPTION DETECTION
Identify unmatched and exception items

PERFORMANCE MONITORING
Track KPIs and reconciliation metrics

MANAGEMENT REPORTING
Generate real-time and historical reports

BETTER DECISION-MAKING
Enable informed business decisions

STAKEHOLDERS & DASHBOARD USERS

Key stakeholders responsible for reconciliation governance, monitoring, reporting, and decision-making.

3. STAKEHOLDERS

STAKEHOLDER	RESPONSIBILITY
 CFO	Executive Oversight Provides strategic direction and governance.
 Finance Manager	Reconciliation Monitoring Oversees reconciliation activities and performance.
 Finance Officers	Exception Management Investigate and resolve reconciliation exceptions.
 Internal Auditors	Control Monitoring Review compliance, controls, and audit readiness.
 Operations Manager	Process Performance Review Monitors operational efficiency and process effectiveness.
 Management	Strategic Decision-Making Uses dashboard insights for business decisions.

GOVERNANCE STRUCTURE

4. DASHBOARD USERS

PRIMARY USERS

SECONDARY USERS

DASHBOARD ACCESS PYRAMID

USER RESPONSIBILITY FLOW

5. DATA SOURCES

Key data sources used by the Payment Reconciliation Dashboard to provide accurate reconciliation insights, exception tracking, and performance monitoring.

6. DASHBOARD PAGES

Comprehensive dashboards to monitor reconciliation performance, manage exceptions, ensure revenue assurance, and drive strategic decisions.

DATA SOURCES
Gateway, Bank, Reconciliation Results, Exceptions

DASHBOARD INSIGHTS
Real-time and historical performance insights

EXCEPTION DETECTION
Identify issues and take corrective action

REVENUE ASSURANCE
Ensure settlements and revenue accuracy

BETTER DECISIONS
Drive performance, efficiency and growth

7. DASHBOARD FILTERS

Global filters allow users to customize dashboard data and view insights based on specific criteria across all dashboard pages.

GLOBAL FILTERS

These filters apply across all dashboard pages to provide consistent and relevant insights.

1. DATE RANGE

Filter data based on the transaction date range.

Select Date Range 

-  Today
-  Yesterday
-  Last 7 Days
-  Last 30 Days
-  This Month
-  Last Month
-  Custom Range

01-May-2024 - 21-May-2024 

2. PAYMENT CHANNEL

Filter transactions by payment channel.

Select Channel 

- ☒ All Channels
- ☒ Web
- ☒ Mobile App
- ☒ USSD
- ☒ POS
- ☒ Agent
- ☒ Bank Transfer
- ☒ Other

3. TRANSACTION STATUS

Filter transactions by their reconciliation status.

Select Status 

- ☒ All Statuses
- ☒ Matched
- ☒ Unmatched
- ☒ Partially Matched
- ☒ Pending
- ☒ In Progress
- ☒ Failed

4. EXCEPTION TYPE

Filter exceptions by exception type.

Select Exception Type 

- ☒ All Types
- ☒ Amount Mismatch
- ☒ Missing in Bank
- ☒ Missing in Gateway
- ☒ Duplicate Transaction
- ☒ Invalid Reference
- ☒ Settlement Delay
- ☒ Other

5. PRIORITY LEVEL

Filter exceptions by priority level.

Select Priority 

- ☒ All Priorities
- ☒ High
- ☒ Medium
- ☒ Low

FILTER BENEFITS

Improves data accuracy and relevance

Enables focused analysis and insights

Saves time and improves user productivity

Ensures consistent filtering across all pages

Enhances decision-making with the right information

Note: Filters are applied globally and will refresh all dashboard components based on selected criteria.

8. BUSINESS RULES

Business rules used to calculate reconciliation performance and classify transaction exceptions.

PERFORMANCE CALCULATION RULES

BR001

Reconciliation Rate

$$\text{Reconciliation Rate} = \left(\frac{\text{Matched Transactions}}{\text{Total Transactions}} \right) \times 100$$

Measures the percentage of successfully reconciled transactions.

BR002

Exception Rate

$$\text{Exception Rate} = \left(\frac{\text{Exception Transactions}}{\text{Total Transactions}} \right) \times 100$$

Measures the percentage of transactions requiring investigation.

TRANSACTION CLASSIFICATION RULES

BR003

Matched Transaction

Transaction Reference and Amount must match between Gateway and Bank records.

BR004

Amount Mismatch

Transaction Reference matches but Amount differs.

BR005

Missing Settlement

Transaction exists in Gateway records but not in Bank records.

BR006

Duplicate Transaction

Transaction Reference appears more than once.

RECONCILIATION DECISION PROCESS

These business rules ensure accurate reconciliation, exception identification, and reliable reporting for informed decision-making.

9. NON-FUNCTIONAL REQUIREMENTS

Quality attributes and system capabilities required for the Payment Reconciliation Dashboard.

01

PERFORMANCE

Dashboard refresh time shall not exceed 30 seconds.

BENEFITS

Real-time insights

- ✓ Faster decision-making
- ✓ Improved user experience

02

SECURITY & ACCESS

Dashboard shall support role-based access.

KEY FEATURES

- ✓ Role-based permissions
- ✓ Data access control
- ✓ Secure authentication

03

DATA INTEGRITY

Dashboard shall maintain data integrity.

KEY FEATURES

- Accurate calculations
- ✓ Consistent data validation
- ✓ Reliable data sources

04

EXPORT CAPABILITY

Dashboard shall support export to Excel and PDF.

SUPPORTED FORMATS

Excel (.xlsx)

PDF (.pdf)

Easy export with one click

05

AVAILABILITY

Dashboard shall be available 24/7.

KEY FEATURES

- ✓ High availability
- ✓ Minimal downtime
- ✓ Continuous access

OVERALL GOAL

Ensure the Payment Reconciliation Dashboard is

Fast
Quick and responsive

Secure
Protect data and access

Reliable
Accurate and consistent

Usable
Easy export and sharing

Always Available
Access anytime, anywhere

These non-functional requirements ensure a secure, reliable, high-performance, and user-friendly dashboard experience.

10. SUCCESS METRICS

Key performance targets that define a successful Payment Reconciliation Dashboard.

TARGET RECONCILIATION RATE

$\geq 95\%$

Measures the percentage of transactions successfully reconciled.

TARGET EXCEPTION RATE

$\leq 5\%$

Measures the percentage of transactions that require investigation.

TARGET SETTLEMENT ACCURACY

$\geq 98\%$

Measures the accuracy of settlement amounts received against expected values.

TARGET REPORTING AVAILABILITY

100%

Measures the availability of dashboards and reports at all times.

BUSINESS IMPACT

IMPROVED ACCURACY

Ensures reliable reconciliation and accurate financial reporting.

REDUCED EXCEPTIONS

Minimizes discrepancies and speeds up issue resolution.

ENHANCED TRUST

Strengthens confidence in data and settlement integrity.

HIGH AVAILABILITY

Provides continuous insights for better decision-making.

Meeting these success metrics ensures operational efficiency, financial accuracy, and stakeholder confidence.
